Forecast for Sunday 26 Sep 2021

Weather: Cloudy overnight with occasional light rain or drizzle and extensive fog, especially in the west and southwest. Low cloud slowly lifting and breaking during the morning allowing some bright or sunny intervals to develop during the afternoon where an isolated shower is possible. Cloud thickening again through the evening.

Chance of cloud free mountain/hill tops above 600m: 10% overnight improving to 90% by early afternoon.

Visibility: Very poor overnight with extensive fog, especially over southwest facing slopes. Improving to good by early afternoon with some distant hills visible.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

While it remains mild appropriate clothing is essential over higher ground due to the possibility of damp conditions early and late. Navigational difficulties should be expected with the hill fog, especially during the early hours.

Recent rainfall: measured at Cat & Fiddle: altitude 511m
